

e-mail Continuity

It can be a nightmare for any organisation when their e-mail service crashes cutting them off from their clients, suppliers and partners. The impact and costs of e-mail downtime can be considerable.

Our e-mail continuity service provides the solution.

e-mail continuity stores all of your e-mail at our secure data centres to give you access 24/7. If your e-mail server has a problem you can instantly log on to your backup system and continue to send and receive e-mail from your office or your home. All personnel will have access to new e-mail and old e-mail from the last 30 days until your own system is fixed.

What does it cost?

No. of Users	Cost	No. of Users	Cost	No. of Users	Cost
5	£20	35	£65	70	£100
10	£40	40	£70	80	£110
15	£45	45	£75	90	£120
20	£50	50	£80	>100	£1 per user
25	£55	55	£85		
30	£60	60	£90		

Prices are per month.

e-mail Protection

Our e-mail protection service protects your organisation from unwanted spam, viruses and malware. The system works by filtering incoming e-mail and removing unwanted messages before they affect your system. By reducing the quantity of unwanted e-mail it also protects your Internet bandwidth and e-mail infrastructure.

What does it cost?

No. of Users	Cost	No. of Users	Cost	No. of Users	Cost
5-45	£1.40	50-95	£1.20	100-249	£1.00
250-499	£0.75	500+	£0.50		

Prices are per user per month.

Hosted e-mail

Our hosted e-mail service provides Microsoft Exchange Server mailboxes in the cloud.

Using the latest versions of Microsoft Exchange and Outlook, you get a generous 25GB of storage per user and access to your e-mail from anywhere with an Internet connection. This includes access via your iPhone or other Smart Phone to your e-mail, calendars and tasks.

The service includes e-mail continuity and e-mail protection so your e-mail is secure and free from viruses and malware.

What does it cost?

Prices start at £5.50 per user per month for a fully hosted & protected mailbox.

e-mail Archiving

e-mail archiving stores copies of all e-mails you send or receive and is a world-class compliance archiving and monitoring solution that seamlessly integrates with email and messaging systems to deliver superior search, retrieval and monitoring capabilities. Its enterprise-class, web-based email archiving tools address the demands of regulatory compliance, audits and eDiscovery while alleviating the burdens of data management, storage, security and business continuity.

A single source for every message. e-mail Archive captures your firm's incoming, internal and outgoing electronic messages in real time, including email, instant messages, Thomson Reuters, Bloomberg, BlackBerry, social media messages and more. An auditable, evidentiary-quality copy of each message is created, which is then indexed, serialized and time/date stamped. The process securely organizes and preserves your intellectual business assets, reducing the risks that often result from poorly managed, lost or deleted messages.

What does it cost?

Prices start at £4.00 per user per month.
